NO LET-UP AT

Company Making the Most of Ability to Produce Red Metal Cheaply.

FORTUNE USED IN EXPLOSIVES ALONE

the time, and the concentrates on hand are far in excess of the demand of the smelter.

"In the steam shovel pit they are taking out the ore from the bottom of the pit and from the upper terraces to the south. While on the west they are tearing out the overburden with dynamite, drill and shovel. In the work of mining in the great excavation, they are burning up powder enough each day to make a fortune for the ordinary little mine. It is Fourth of July all the time in the pit, and there seems to be no letup to the blasting, day or night. But the explosives are doing the work down to the ore, and then getting out the ore.

"Five steam shovels are kept busy all the time, and drills are going in all directions. Some of these are digging out the powder holes and others are advancing the development of the pit to the south and to the southeast, where lies the best ore, and in which direction the big ore body is trending.

"At the Liberty pit they are doing considerable work while waiting for the tools with which to take out the ore. Now, it is a question as to when that first steam shovel will arrive. It was to be delivered this month, and last week news came that it could not be landed here until October. Meanwhile they are busy with surveys, pipelines, track-laying, and seven or eight teams are doing the excavating work. The Liberty will not compare in size to the present pit, but some of the ore there will go considerably higher than that which is being taken out of the big excavation. Even now there is a gang of in the neighborhood of fifty men at work, and when active operations begin in the fall, this number will be increased to 200 or 200. Copper Flat is a busy center and it will continue to grow still more busy."

MINES DIRECTORY FILLS

MINES DIRECTORY FILLS VERY PRESSING NEED From King J. Bowers Keystone

The Mines Directory company of Salt Lake City has prepared volume 1 of "The Mines Directory." which fills one of the greatest wants in western mining and investment circles. The volume contains Lo. Mam. greatest wants in western mining and investment circles. The volume contains accurate information and statistics on the mining and smelting industries, going into detail regarding the mining laws of the western states, the various listed and unlisted mining properties and companies. As stated on the title page, and as is fully borne out by investigation, the volume is devoted to giving statistics as to production, consumption and prices of gold, silver, coal, petroleum and natural gas in the United States and other countries. An alphabetical list of brokers, mining exchanges, banks and bankers, mining exchanges, banks and bankers, mining exchanges, banks and bankers, mining engineers and assayers, arranged by cities, also is given in the volume. The list of mining companies, with their capitalization and officials, of Arizona, California, Idaho, Montana, Nevada and and all is especially valuable for reference. — Mines Directory is a handsome volume, of convenient size and splendidly gotten up in every particular.

Ore Shipments.

ume, of convenient size and splendidly gotten up in every particular.

Ore Shipments,
The Utah Ore Sampling company on Tuesday released eight cars of ore from Utah and three cars from Nevada camps.

American Day at Lagoon-Today

Music will be furnished by the Don

Philippini celebrated Italian band of 45

All trains for Lagoon leave Salt Lake and Ogden Rallway Depot, corner Third West and South Temple Streets.

A GOOD TIME FOR EVERYBODY

This silver-lead-gold ore producer is now making regular shipments to the Salt Lake shelters, and a splendid showing of ore is being brought to light by means of the main shaft workings. Those who believe Salt Lake has a monopoly on hot weather are invited by Mr. Morrison to visit the hills of Beaver. The weather there is unusually hot.

"Is Life Worth Saving?" Mrs. Mollie McRaney, Prentiss, Miss writes that she had a severe case kidney and bladder trouble, and th four bottles of Foley's Kidney Remed cured her sound and well. She clos her letter by saying: "I heartily red ommend Foley's Kidney Remedy to an sufferer of kidney disease. It saved m life." Schramm-John, drugs, five stores.

Rice Mountain-Coming out?

BIG COTTONWOOD CON. SELLING OVER IN EAST | BEGINS DEVELOPMENT WORK

W. L. Harwood of the Big Cottonwood Consolidated company stated on Tuesday that he had placed a force of men at work on this Big Cottonwood district group, the property being just below the Carbonate, which recently was taken over by prominent New York interests. Mr. Harwood says that the first work will be to send a long and deep tunnel to explore the territory beneath four or more splendid lead and silver ore croppings and effort will be maintained continuous ly until results are gained. Mr. Harwood believes in the Big Cottonwood section, and says that it never looked better than it does today. He at one time held an option on the Cardiff mining property from T. A. Reamer, and this today, in the hands of woll-known Salt Lakers, is one of the big propositions of that district. Three teams are employed in bringing Cardiff ores to the valley smell ters.

George Holleran, one of the lucky Salt Lakers who made a fortune out of the famous Jumbo lease at Goldfield, has struck it again in Nevada. He and a famous Jumbo lease at Goldfield, has struck it again in Nevada. He and a cumber of Salt Lake operators recently secured a lease on the Lucky Boy properties at Hawthorne, which is called the Silver Moon lease. Permission was given by the Lucky Boy company to operate a drift was started at once from the 550-foot level to the Silver Moon block of ground.

A few days ago, while Mr. Holleran was at the property, the operating force opened up a rich vein of silver-lead ore, which carries values of better than \$150 to the ton. This vein is four feet wide and each day there has been disclosed more of the ore as the development work is advanced.

NEVADA CONSOLIDATED IS

SILVER SHIELD COMPANY INSTALLING NEW MILL

General Manager Harry S Joseph of the Silver Shield company states that the foundations for the new concentrating plant at Bingham are pretty well completed, and the rest of the plant equipment will be installed as quickly as possible. This mill will eventually have a daily capacity of sixty tons of ore, concentration to begin in a modest way until the mine is in shape to provide the maximum tonnage. Connections have been made with the new ore from the good provide the maximum tonnage. Connections have been made with the new ore from the guggenheim interests, and in charge of the Nevada Consolidated operations, was in Sait Lake for a few hours Tuesday enroute from Ely to New York City, when seen by The Tribune. Mr. Yeatman was busy with local associates, but he paused long enough to say that there was nothing out of the ordinary to tell regarding operations in the big White Having been sent 110 feet and a raise sixty-five feet to complete these connections. There are one or two additional connections to be made before the management will be able to til the mine is in shape to provide the maximum tonnage. Connections have been made with the new ore from the 300 level, a drift having been sent 110 feet and a raise sixty-five feet to complete these connections. There are one
